

- courses have a strong practice-orientation and include many practical exercises
- very modern campus with state-of-the-art machinery and modern classrooms
- small class size
- get to see interesting German companies
- great opportunity to get international experience and learn a lot about different cultures
- find new friends from all over the world
- last but not least: great fun!

For the fifth time now, Hof University offers an International Summer School with an exciting and highly relevant course:

**ERP Systems**

In the past years, students from many different nations participated, learning a lot and having a great time with each other.

We are looking forward to welcoming you in our International Summer School 2014 - be part of the experience!

**International Summer School 2014**

July 7 - 25, 2014

**ERP Systems**

The first part of the course provides fundamental knowledge in logistic processes with SAP R/3 Enterprise®. In the second part, you can choose between a specialization on accounting or programming with the SAP R/3® system.

The logistics part focuses on the production process within the supply chain. It provides an introduction into administrative and industrial processes, basics of logistics, knowledge about obtaining materials,

producing and distributing products in the proper place and in proper quantity. It teaches methods for planning and controlling the manufacturing process, the materials and the capacity.

The accounting specialization gives an overview of different processes in financial accounting and the integration between general ledger and sub-ledger, organizational structures and master data in financial accounting. It explains business processes in the sub-ledgers as accounts payable, accounts receivable and asset accounting.

The programming specialization introduces the concept of SAP® - Application programming. We use the object oriented interface provided by SAP®. SAP®-Business Objects allow the programmer to read and write data from and to the R/3®-System by calling their methods. SAP also offers its own ActiveX-Controls which can be used for simple access to its objects.

This course is available to enrolled students only! SAP® and R/3® are registered trademarks of the SAP AG.

### Target group

Advanced students who have completed a minimum of two years of studies in the field of Business, Business IT or a related field. The course level corresponds to third year level (senior year) of a Business degree. For the programming specialization, at least basic programming skills are required.

The Summer School includes an extensive supporting program including

- guided excursions to companies
- one weekend sightseeing tour
- guided city walk, barbecue, movie night, international buffet etc.
- free sports facilities on campus (tennis, soccer, volleyball, basketball, aerobic, fitness etc.)
- free 24-hours access to the internet and the library at Hof University

### Board and lodging

Participants stay in single rooms in student accommodation on campus with shared kitchen for self-catering. The price for accommodation is included in the course fee. Meals in the university's canteen or cafeteria are available at reasonable prices (EUR 2 to 5 per meal).

### Language of instruction

Both courses are taught fully in English language. Knowledge of the German language is not required to follow the program.

### Number of participants

25 max.

### Work load and credit transfer

30 contact hours per week plus individual/ group studies. Participants receive a certificate with explanatory supplement and can gain 5 ECTS-points. Credit transfer depends on the regulations of the home university.

### Course fees

EUR 890

Excursions and accommodation are included in the course fees. Meals are to be paid separately.

For students from partner universities, a limited number of scholarships is available.

### How to apply

Application is possible until March 31, 2014. Please apply online in our application portal:
