Renewable energy

The Federal University of Rio Grande do Norte is among the top 10 universities in Brazil.

Founded on June 25th, 1958, it has a built area of approximately 300.000 m², encompassing the 07 campus spread all over the state.

UFRN provides a broad range of opportunities, at both undergraduate and graduate level, totaling more than 200 programs and currently carrying out approximately 1500 research projects.

Its academic Community encompasses more than 43.000 students and around 5.425 employees, among technical-administrative staff and full professor, in addition to adjunct and visiting professors.

Institutional Internationalization Program - PrInT/CAPES

The Program provides graduate students and professors with scholarships so they carry out advanced studies in academic and scientific excellence institutions abroad..

In **2019**, its **first year** of existence, the **priority** was to send university students and professors who teach at graduate programs, especially **those with no previous experience abroad**, to attend doctoral studies in foreign institutions.

Strategic themes for the internationalization of UFRN

UFRN's Internationalization Plan seeks to expand its activities favoring a more comprehensive approach, instead of focusing on specific fields of activity. Each of these themes is part of the Sustainable Development Goals of the United Nations's 2030 Agenda, to which the current UFRN administration is committed, to the point of highlighting them in the goals and actions of the entire university, thus expanding those goals established in that Plan. The themes are as follows:

Strategic themes for the internationalization of UFRN

Public Health and Well-being:

Themes involving: Neglected and Degenerative Diseases, Evolution, Cognition and Behavior, Public Health

Energy:

Themes involving: Renewable Energies, Smart Electrical Networks

Strategic themes for the internationalization of UFRN

Innovation in Science and Technology:

Themes involving: Biotechnology, Complex Systems, Aerospace Science and Technology, Information and Communication Technologies, Nanotechnology

Environment and Conservation:

Themes involving: Biodiversity, Sustainable Development
